

BARBER RANCH
Spring Bull & Heifer Sale

THURSDAY, FEBRUARY 27, 2020

12 noon at the Ranch...Channing, Texas

65 HEREFORD LOTS

Welcome to Barber Ranch!

Dear Fellow Cattlemen,

Thank you for your interest in the Barber program! We look forward to what we predict will be a strong cattle market in 2020. This is our first bull sale on the ranch in several decades, but we believe the timing is right and the genetics will not disappoint. Our focus will continue to be raising bulls that excel for both Hereford seed stock producers and commercial cattlemen alike. We are very in tune with both industries these days and believe that our commitments to both go well beyond sale day.

This particular set of cattle features some of the most popular bloodlines nationally in the Hereford breed today, and we take great pride that so many are Barber bred on both sides of the pedigree. In addition to keeping our own genetics relevant, we continue to look for ways to better adapt for the future and for our customers. Doing this, we purchased John Loewen's cow herd last spring. John focuses on homozygous polled cattle with big EPD spreads, lots of pigment and excellent udders, all of which align with our goals at Barber Ranch. A big highlight of this purchase are three flushmate sisters to the popular Genesis bull that recently sold for \$100,000. These sisters were the Champion Pen of Hereford Heifers at the National Western Stock Show last month in Denver, CO, and we are pleased to be offering as Lots 101A, 101B and 101C one-half interest in whichever sister the buyer prefers.

In addition, we believe the quality is certainly here in both the bulls and females being offered at auction. Please bid with confidence, knowing that every animal is backed by a breeding season guarantee, and know that we look forward to servicing you beyond sale day. We are a family owned and operated ranch since 1904, and we want you to know that we continue today to believe in the business, the industry and the people that make it go.

Sincerely,

The Barber Family

From left: Justin, Terri, Dale, Mary, Jason and Brett Barber

BARBER RANCH has been family owned and operated since 1904, running purebred Hereford cattle continuously. We have used artificial insemination for nearly 50 years to continually strive to offer our customers cattle that will rank at the top of the industry, both genetically and phenotypically. Embryo transplant is also heavily utilized to produce genetics that are consistently on the leading edge of the Hereford industry. Barber Ranch bloodlines can be seen throughout Hereford pedigrees all over North America. We continue to seek fresh genetics and are proud to offer breeding options that are at the forefront of the curve.

We strive to raise bulls that will sire progeny that perform in the pasture, in the feedyard and on the plate. We demand cattle with a lot of maternal ability bred into them, great udders, and a good look. You are invited to visit us online and at the ranch any time... and especially sale day, February 27th!

“SIGHT-UNSEEN GUARANTEE”

To make buying easy, we offer a sight-unseen guarantee.
Leave a bid...buy over the phone...buy through Superior.
If they don't meet your approval, they come home.
It's that simple.

Cattle will be sold on video and will not enter the ring.

The cattle will be displayed outside the sale barn.

Sale order will be available sale day.

***Cattle are available for viewing at the ranch at your
convenience. Lunch will be provided sale day.***

Videos online prior to sale day at superiorlivestock.com

SALE TERMS & CONDITIONS

TERMS: Cash or check. Cattle will be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchaser during or immediately following the sale and will not be released until after settlement has been made. Each animal will be at the purchaser's risk immediately after it is sold.

HEALTH: The health of the cattle selling is excellent. Each animal will be accompanied by an individual health certificate for immediate interstate shipment.

GUARANTEE: Each registered animal will sell under the Suggested Terms and Conditions of the American Hereford Association.

BREEDING GUARANTEE: Bulls sold in this sale are fertility tested and are guaranteed by Barber Ranch to be breeders, provided they are properly handled and cared for by the purchaser. Any bull failing to breed after a trial of six months may be returned to the seller if in good condition. The seller reserves the right to try said bull for six months, and if it proves a breeder to return him to the buyer at buyer's expense. If the bull proves a non-breeder, the bull will be replaced, or credit will be issued for the next year's sale at the purchase price minus salvage value of the bull. Seller is not liable for bulls lost due to injury or death.

ANNOUNCEMENTS: Announcements made sale day from the auction block will take precedence over statements in the catalog or other advertising. We reserve the right to withdraw any sale lot not meeting our specifications prior to sale time.

LIABILITY: All persons who attend the sale do so at their own risk. Neither the owners, Layton Auction Services nor any other persons connected with the sale assume liability, legal or otherwise, for accidents or loss of property.

Barber Ranch reserves the right to collect, freeze and use semen within their own herd on any bull sold in this sale.

Semen collection would be done at Barber Ranch's expense and the buyer's convenience.

• • • • •

Barber Ranch reserves all cloning rights on all cattle sold.

Using EPDs as Selection Tools

Cattle Evaluations use the term Expected Progeny Difference (EPD) to express genetic transmitting ability of a sire for the various traits listed. An EPD is a prediction of how future progeny of a sire are expected to perform in a particular trait, relative to other sires in the analysis. The key word is “difference.” The EPD itself does not imply “good” or “bad” performance; rather, the EPD gives a prediction of the average “difference” to expect in the performance of a sire’s progeny relative to other sires in the same analysis.

The EPD for a given trait on each animal in the analysis is compared to every other animal in the analysis. The EPD is reported as a plus or minus value in the unit which the trait is measured. EPD accuracies on non-parent animals are relatively low and are not reported in this catalog. The American Hereford Association (AHA) measures 17 traits and calculates three profit (\$) indexes. A comprehensive sort of Hereford sires can also be done online at www.hereford.org.

Hereford EPDs and \$ Indexes included in this sale catalog are:

Calving Ease Direct (CED) Based on calving ease scores and birth weights and measured on a percentage. CED EPD indicates the influence of the sire on calving ease in females calving at two years of age. For example, if sire A has a CED EPD of 6 and sire B has a CED EPD of -2, then you would expect on average if comparably mated, sire A’s calves would be born with an 8% more likely chance of being unassisted when compared to sire B’s calves.

Birth Weight EPD (BW) An indicator trait for calving ease, measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A’s calves would come 3 lb. heavier at birth when compared to sire B’s calves. Larger BW EPDs usually, but not always, indicate more calving difficulty

Weaning Weight EPD (WW) An estimate of pre-weaning growth, measured in pounds.

Yearling Weight EPD (YW) An estimate of post-weaning growth, measured in pounds

Scrotal Circumference EPD (SC) Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull’s own semen quantity and quality and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty.

Maternal Milk EPD (Milk) The milking ability of a sire’s daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires’ daughters’ progeny due to milking ability. This difference in weaning weight is due to total milk production during the entire lactation.

Maternal Milk & Growth EPD (M&G) Reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters’ progeny weaning weight. It is equal to one-half the sire’s weaning weight EPD, plus all of his Milk EPD.

Calving Ease Maternal (CEM) Predicts how easily a sire’s daughters will calve at two years of age and measured on a percentage. For example, if sire A has a CEM EPD of 7 and sire B has a CEM EPD of -3, then you would expect on average if comparably mated, sire A’s daughters would calve with a 10% more likely chance of being unassisted when compared to sire B’s daughters.

Carcass EPDs

Carcass records are adjusted to an age constant endpoint. Therefore, selection based on any or all of the carcass merit EPD is comparable among cattle at the same age endpoint. For example, selection based on increased EPD for carcass weight will result in heavier carcass weights than those animals with lower EPD for carcass weights when the cattle are harvested at the same age.

Carcass Weight EPD (CW) Carcass weight is a beneficial trait when considering the impact that pounds have relative to end product value. At the same age constant endpoint, sires with higher values for carcass weight will add more pounds of hot carcass weight compared to sires with lower values for carcass weight.

Ribeye Area EPD (REA) REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Hereford EPD Averages for 2018/2019 born calves as of 1/27/20:

CED	BW	WW	YW	SC	Milk	M&G	CEM	CW	REA	Marb	BMI\$	BI\$	CHBS
+2.3	+3.0	+53	+84	+0.9	+24	+51	+1.9	+65	+37	+0.8	+332	+399	+101

Marbling Score (Marb) Marbling EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat (IMF) based on carcass measurements of harvested cattle. Breeding cattle with higher Marb EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

\$Profit Indexes

Baldy Maternal Index (BMI\$) The Baldy Maternal Index is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed toward Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake but a positive weighting on Carcass Weight, which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Ribeye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

Brahman Influence Index (BI\$) The Brahman Influence Index is a maternally focused index that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed toward a commodity beef market, since Certified Hereford Beef does not accept Brahman-influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk, which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake but a positive weighting on Carcass Weight, which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and Ribeye Area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. This index targets producers who use Hereford bulls on Brahman-influenced cows.

Certified Hereford Beef Index (CHBS) The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight to ensure profit on the rail. As well, there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. Keep in mind, this production system takes advantage of complimentary breeding with the commercial Angus cow. Although Marbling is weighted positively in this index, a positive weighting for Ribeye Area and a negative weighting for Back Fat are a greater priority in this index to allow for optimum end-product merit. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

EPDs are updated weekly by the American Hereford Association, so we cannot guarantee the EPDs listed in the catalog. The EPDs printed are from the 1/27/20 evaluation of the AHA. View up-to-date EPDs at www.hereford.org.

Genomic-Enhanced EPDs The accuracy of breeding values in young cattle is enhanced with DNA testing. EPDs that were genomically enhanced at catalog press time are indicated by this symbol.

**Actual birth weight is included in addition to
adjusted 205-day weaning weight
and adjusted 365-day yearling weight.**

**Pigmentation for Left Eye and Right Eye is also included.
Actual scrotal circumference measurements will be available sale day.**

ABSENTEE BIDDERS: HOW TO PARTICIPATE ON THE PHONE OR ONLINE

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for buyers unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at: www.superiorlivestock.com.

Here's How It Works...

Turn in Bids Over the Phone. This is our traditional method of buying livestock and is the suggested process for anyone who does not have excellent, high-speed internet. To get started, simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number." Select the registration form for Superior Productions and print the registration form. Fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information, Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's online bidding program for cattle buying. Please note that high speed internet is required—this is not for dial-up or satellite internet. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy; just go to the home page of www.superiorclicktobid.com and follow the outlined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward, you just have to sign in and select the sale you would like to register for and, once approved by the ranch, you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. Sale will be broadcast on www.superiorclicktobid.com. The video feed on the homepage of www.superiorlivestock.com looks the same as the video feed on TV and can be watched over a smartphone or tablet. Remember, you can call in to bid whether watching on the TV or on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid."

Buyers will be contacted by the ranch after the sale for payment and delivery details.

IF YOU NEED ANY ASSISTANCE, CALL SUPERIOR: (800) 422-2117

Contact these Superior Livestock representatives to buy bulls or to sell calves sired by bulls purchased in this sale:

ALL BULLS IN THIS SALE QUALIFY FOR SUPERIOR PROGRESSIVE GENETICS

Superior Progressive Genetics (SPG) is a Value Added Program launched by Superior Livestock Auction to create a premium for commercial cattlemen when they sell calves on Superior by identifying load lots of cattle sired exclusively by bulls purchased directly from qualified seed stock producers. SPG brings attention to the investment commercial cattlemen have made by doing business with leading seed stock producers. Barber Ranch or Express Ranches and their bull buying customers will be recognized by branding the SPG icon and the Barber Ranch or Express Ranches logo on qualified load lots as the cattle sell on Superior's video sales live on television and the internet. In addition to the qualified lots being identified on television, the lots will also be branded as "SPG" in Superior Livestock Auction's print and web sale catalogs.

Additional Benefits to Commercial Cattlemen Selling on Superior:

- ✓ Doing business with a reputable company who has your best interest in mind.
- ✓ Superior ties the commercial and purebred cattle industry together full circle.
- ✓ Largest cattle auction in North America along with the largest active buyer list.
- ✓ Can sell on contract to take advantage of current market conditions and deliver at a later date.
- ✓ Established premiums for cattle on good health programs.
- ✓ Established premiums for many Value Added Programs.
- ✓ Cattle are sold "country fresh" direct from the ranch, resulting in less stress.
- ✓ Seller determines weighing conditions.
- ✓ Seller does not have the expense of trucking.
- ✓ Payment is guaranteed to sellers through Superior's bonded custodial account.

For more information, contact Superior at (800) 422-2117

or visit www.SuperiorLivestock.com.

- ✓ A powerfully constructed 4030 son with a top notch EPD profile. This unique individual stems from the immortal donor dam BR Abigail 8130. 8130 in our May 2018 Mature Cowherd Dispersal commanded \$47,500 at 10 years of age. She has produced countless herd bulls and donors that are working in some of the most prestigious Hereford seed stock operations across the country. This will be one of the last opportunities to acquire direct progeny from this dominant donor female.
- ✓ Ranks in the top 1% for CW; top 2% for CHB; top 3% for YW and REA; top 10% for WW and Milk.

+12.3	+0.6	+56	+90	+1.3	+24	+52	+8.8	+68	+43	+29	+315	+396	+109

✓ Homozygous polled and calving ease! A surefire heifer bull equipped with performance and valued-added marbling. His maternal grandsire, A36, is a full sib to the dam of Genesis and the full sisters to Genesis selling as Lots 101A-B-C.

✓ Ranks in the top 3% for CED; top 5% for SC; top 10% for BW and Marb; top 25% for WW, YW and CHB.

In May 2019, Barber Ranch had the opportunity to purchase the renowned Loewen Herefords herd at Waukomis, Oklahoma. We appreciate this incredible opportunity. The Loewen herd represents 80 years of breed improvement with an emphasis on calving ease, udder quality and carcass traits. The bulls selling as Lots 18–24 are a result of this purchase.

(Sire's EPDs)

CE	BW	WW	YW	SC	Milk	M&G	CEM	CW	REA	Marb	BMI\$	BI\$	CH\$
+6.6	+2.4	+57	+88	+0.5	+25	+54	+1.1	+74	+50	+27	+353	+436	+104

✓ Had he been out of a registered Hereford cow, we could have started the sale with this bull! 9001 is sired by our resident herd sire BR Sooner 6701 and out of a commercial Hereford cow that came from our good friend Bradley Hale. Bradley has produced some of the most sought after Hereford-influence females and show steers in the country, and it is easy to see why when they produce progeny like 9001.

✓ This bull is flawless in his phenotype, sound in structure, super big bellied, wide pinned, big topped, clean chested and ultra-cool fronted. Certainly one of the unique individuals that Barber Ranch is offering in this super deep set of bulls.

BR BELLE AIR 6011
Sire of Lot 41

- ✓ What a way to kick off the fall division with one of Justin's favorite bulls in the entire offering! Once you see this bull in person, it is easy to see why he is a favorite. Although he is stout in his design and build, he comes in a calving-ease package which makes this bull *soooo* unique. Square hipped, big boned, big bodied, super sound and way cool looking. Study the pedigree and the cow power behind this beast. Seldom will Barbers let a bull of this caliber out of their sights, but to your good fortune he is stacked with their genetics, making him almost impossible to use in their herd due to his close relation to the majority of the females on the ranch.
- ✓ This Belle Air son is a true BEEF BULL in every sense, as he combines calving ease, performance, maternal strength and value-added carcass merit as well as any bull in the sale. Big time herd sire prospect here!
- ✓ Posted a BW ratio of 99 and WW ratio of 102.
- ✓ Ranks in the top 1% for SC; top 5% for CED; top 10% for REA and Marb; top 15% for Milk; top 20% for BW and WW.

**BR RA COPPER 128Y**

Sire of Lot 42

✓ You want a big time performance bull that is homozygous polled? Well, here he is. Big hip, big topped, big boned and as long as a well rope. A double bred Sooner on the top side, and his dam is sired by the full brother to "Belle," who is the dam of Belle Air. 8108 is one of the stoutest homozygous polled bulls you will find anywhere in the country.

✓ Posted ratios of 115 for WW and 110 for YW.

✓ Ranks in the top 3% for WW and YW; top 10% for CW and CHB; top 20% for REA; top 25% for BII.

Videos of all lots will be on Superior's website prior to sale day.

Flushmate brothers sell as Lots 43, 44 & 45

- ✓ The next three bulls are flush brothers, with Lot 43 being the polled one while the other two are horned. F087 is a very attractive 2296 son that is darker red in color when compared to many of his counterparts. You have to admire his length, extension, bone and overall dimension. This bull has a high ceiling in breeding potential. Their donor dam is a full sister in blood to the ever-popular Anastasia.
- ✓ Ranks in the top 15% for Milk.
- ✓ Full brothers sell as Lots 44 and 45.

- ✓ To finish off this trio of brothers, you need to analyze the bone and power that F088 brings to the table! He defines the word "power." As you analyze him from rear to front, he is an impressive beast to evaluate. Monster hipped with shape and design, big footed, huge boned, big topped and flat out cool fronted. You have to love the way his neck ties into the top of his shoulders and the way his shoulders blend back into his top line...you could not draw it any better. All three are a little different but really good in their own right. You decide which one fits your program the best.
- ✓ Ranks in the top 1% for WW; top 2% for YW and REA; top 3% for CHB; top 4% for CW; top 15% for Milk.

- ✓ What a way to end the bull division with this maternal brother to the two-time NWSS Supreme Champion Hereford BR Belle Air 6011. 8148's sire, Aventus, was a Supreme Champion as well. The dam, 4082, better known as "Belle," is one of the premier females ever produced at Barber Ranch. A big time power bull with a big time pedigree.
- ✓ Ranks in the top 15% for WW, YW and REA; top 25% for Milk.

Stand out with Proven Genetics

THE HEREFORD ADVANTAGE PROGRAM

Increase added market power and brand recognition with feeder cattle sired by a Hereford bull battery ranking in the top 50% for CHB\$ index.

**PROGRAM BENEFITS:**

- ✓ EPD ranking summary
- ✓ Added market exposure
- ✓ Genetic improvement tool
- ✓ Access to AHA resources
- ✓ Get started at HerefordFeederCattle.com

Certified Hereford Beef Index(CHB\$) is a terminal sire index that is built on a production system where Hereford bulls are used on Angus-based cows with a focus on feedlot performance and end-product merit. To qualify for the Hereford Advantage program, cattle must be sired by registered Hereford bulls with transferred ownership, and the Hereford bull battery must have a CHB\$ value ranking in the top 50%.

Here is Barber Ranch's popular Grand Champion Pen of Three Hereford Females at the 2020 NWSS that created quite a buzz along with their flushmate brother, Genesis, in Denver. Genesis was the talk of the town Thursday night at the Mile High Eve Frozen Genetics Sale when his semen commanded \$760 per unit on 100 units. Then on Friday morning, these full sisters captured the Grand Champion Pen of Three Females!

The interest in these three January yearling heifers has been unprecedented, so Barber Ranch has decided to offer 1/2 interest in the buyer's choice of these sisters.

Produced in the Loewen Herefords program in Oklahoma, they came to Barber Ranch with the acquisition of the Loewen herd in its entirety in May 2019. Barber Ranch feels this trio of sisters defines and exemplifies what the Beef Business is about. They excel both phenotypically and numerically unlike any other females that have graced the pastures at Barber Ranch. These females along with their brother will play a major role in the Barber Ranch program for years to come.

Barber Ranch will let you decide which one you like best, as they like all of them. They are all homozygous polled, have 100% eye pigment, check all the boxes numerically and excel phenotypically. Not much more you could ask for!

This is one of those opportunities that only comes around on rare occasion, so take full advantage of the opportunity to get in on a breed-changing female!

- ✓ Ranks in the top 5% for CHB; top 15% for Marb; top 20% for BW.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

Thank you from the Dale Barber Family!
